**Description:**

HPRC® a composite, malleable and highly performing material that allows the production of elements of any shape. HPRC® is characterised by its very high mechanical resistance (traction / compression) and im-permeability. It is highly resistant to shocks and atmospheric agents (salt, smog, ice, sand, etc.). The smooth and material finish and the very high ability to disperse heat / cold make it a very comfortable materi even in extreme climatic situations. An anti-graffiti material and, if necessary, repairable thanks to the repair KIT supplied on request. An ECOLOGICAL material, it is produced with at least 30% recycled and 100% recyclable material, and which meets the minimum environmental criteria (MEC) dictated by current regulations. A material that make today's product a resource for the future and that allows the transition to th circular economy.
